This option allows you to reduce the ecological footprint of your trade fair participation. We use certified 100% recyclable floor covering. We replace PVC infill surfaces by sustainable fabrics, which is printed according to the customer's design and can also be used several times. The system frame elements (MegaWall) made of aluminium and the energy-efficient LED spotlights are reused over many years. Equipment such as furniture is rented and also used by the furniture supplier for several years.

Details in brackets refer to a stand area of 32 m² and more.
Further equipment can be ordered at the Exhibitor-Service-Portal.
